

Predeveloped Architectural Sheets

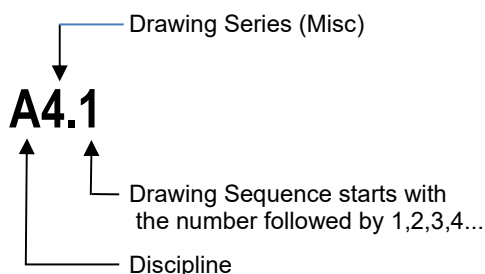

This document outlines the predeveloped architectural sheets, their Dept Code, sheet number, and sheet name, parameter. The Cover sheet and the AR.0 - Architectural Reference Information sheet are in the Sheets - 3 Construction Documents folder of the project browser, while the remaining predeveloped architectural sheets are in the Sheets - 4 Unused Construction Documents folder.

The following describes the way to number Architectural Drawings and the order that the Drawings are placed in a Construction Set:

EXAMPLE (FLOOR PLANS):

EXAMPLE (MISC. DRAWINGS):

Architectural Drawing Designators

Architectural Drawing Designators are the first one to three letters of the sheet number that designate what discipline or subdiscipline a sheet belongs to.

A	Architectural
AR	Arch Ref Info
AS	Arch Site
F	Furniture
FSE	Food Service Equip
EQ	Equipment
LS	Life Safety

Sheet Series Designators

The Sheet Series Designators are the groups of sheets that comprise the Construction Document Set. The dot following the Drawing Designator is a delimiter between the Drawing Designator and the Sheet Sequence Number. The underscore is a placeholder for the next sequential sheet number in the drawing series. For example, if there is a third floor of the building, the Third Floor Composite Plan sheet number would be A0.3 and the Roof Composite Plan sheet number would be renumbered from A0._ to A0.4.

Levels below First Floor are numbered sequentially as 01, 02, etc. The first level below the First Floor is numbered 01. If there is a level below that level, it would be numbered 02 and so on.
